About Us

KARON is a wholesale trading company that provides high quality products and services. Distributing selected brands, KARON strives to meet the needs of customers and exceed their expectations. KARON has a wide range of food and beverage, cleaning products and more and provides all for your needs.

KARON brands meet with distinguished customer base at the most exclusive points of Turkey. This makes KARON a preferred business partner. KARON has a simple mission: **to make customers' lives easier, provide excellent service, and help them grow.** Its values are an essential part of its culture and the source of its continued growth and success.

With its wide product range, KARON offers domestic and imported food, nuts, flour, olive oil, healthy and vegan snacks, organic farm products, fresh vegetables and fruits carefully produced with the principle of clean agriculture, cleaning detergents and chemicals, from selected brands to wide-ranging food products, beauty and cosmetics products, lumber, medical and medical products, paper and paper products and printing packaging companies in its portfolio. It aims to offer the products and services that meet the market demand to its customers in the fastest and most accurate way. KARON offers a wide range of product solutions to its customers' needs. Sustainability and food safety are the main targets in their business where adherence to industry regulations helps reduce risks for their clients. KARON's local focus has been a major role in its success and leads it to develop strong relationships with customers in every community.

FOOD

Organic food, which refers to the production process of foods, has been frequently encountered in recent years when the return to natural life has begun. So how do you know if a product is truly organic? First of all, in order to use the organic label, you must make sure that no artificial additives are used in it. For example, it should not contain substances such as colorants, sweeteners and preservatives. The plants of the products in the organic food category are improved by using natural fertilizers.

What is Organic Food? Products grown without the use of artificial chemicals, hormones, genetically modified organisms are called organic food. Fruits, vegetables, meat varieties, cereals and dairy products can be counted among the product alternatives that can be grown organically.

Industrial production, which has become widespread in the food sector; You may want to turn to natural food products because of the concern that fast, low-cost and standard quality products may start to deviate from natural and cause negative effects in terms of health, but you may not be able to find them everywhere. KARON brings organic, natural and gourmet flavors from world-famous brands and domestic producers to you. Gathering dozens of products in different categories such as organic breakfast products, natural drinks, sauces, snacks, chocolates, sweets, spices, soups, olives and olive oils, KARON offers gluten-free products and vegan foods that can be easily consumed by celiac patients, as well as organic products of reliable brands.
